

Delivering on-cost innovation

Accelerate Productivity Through Leading Composite Cutting Tools

Cajero is a leading manufacturer of cutting tools for the machining of composite and aerospace components. As a successful value-led solutions provider we supply industry with the largest standard range of drills, routers, countersinks, and surfacing tools. Working in synergy with you.

Cajero / Cut / Composites

composites

carbon fibre - CFRP | graphite composites | BMI composites
aramid fibre - AFRP | glass fibre - GFRP | prepreg

honeycomb core

aramid/Nomex®/Kevlar® | aluminium | thermoplastic

composite & metal hybrid stacks

CFRP/CFRP, CFRP/titanium, titanium/graphite (TiGr), CFRP/aluminium
titanium/CFRP/titanium | titanium/CFRP/aluminium

carbide drills | CVD diamond coated drills | PCD tipped drills | single shot drills - replaceable PCD head drills & reamers | carbide reamers | coated reamers | carbide routers | CVD diamond coated routers | PCD tipped routers | PCD tipped insert countersinks | brazed PCD tipped countersinks | integral pilot countersinks | depth-stop countersinks | back-face countersinks | honeycomb core surfacing tools | honeycomb core slotting tools | honeycomb core contouring/radius tools | carbon fibre surfacing tools | carbon fibre contouring tools | rivet shaving tools | ultrasonic knives
